

Brainstorming  
Dawson Tocarchick, Richard Dell

Large Scale Ideas

1. A world in which wherever a person touches becomes dirty and autonomous robots clean the 'virus' ridden world around us.
2. A city, recreated, not exactly the city but a small replica of what used to be. A facade of what the real world was with an ever dwindling population.
3. Hospitals on every corner of the world, the virus has developed into an instant killer, much like snake venom, it can kill quickly so everyone carries their vaccines and hospitals cover every corner.
4. The reliant drug... A drug that controls peoples' ability to get sick, Immune systems in the future suck, So taking this drug will keep you alive essentially. Big corporate companies sell the drug. Big pharma takeover
5. Sanitizer Mistlers when you walk into buildings.
6. Self driving cars.
7. SKY FULL OF SATELLITES, elon musk take over
8. MARS.... MARS... MARS.... Mars colonization.
9. Murder room, dead bodies hanging, skulls on sticks, blood everywhere
10. Tropical island, different fruit trees, ocean surrounding it
11. Underwater coral reef with fish swimming everywhere
12. Prehistoric, dinosaurs and cavemen
13. Space mission, navigate through an asteroid field
14. WW3!!!!!!!!!!!!!!!!!!!!!!
15. World like plague inc.
16. Post-apocalyptic world, everything dead and on fire

Small Scale Ideas

1. A house in which a student can learn from the comfort of their home.
2. Walls become screens essentially. No more monitors.
3. Roomba type sanitizing bots. WALL-E
4. Home schooled children, Elon Musk owns the school system in the future so he is big brother.
5. A small garden in your backyard
6. Sitting in the living room playing cod
7. Doing homework in the library
8. Counting coins in a bank
9. Government controlled experiments.
10. House filled with behavioral tests and tasks to complete everyday.
11. Part of a large experiment that the player in Unknowingly taking part in.
12. Government experiment, solving mystery trying to escape the hell you live in to.
